# English Tutorial

3

Name : _____

Class : _____

School : _____

Preface

Dear Teacher / Parent

Let's engage in creative learning

This tutorial book starts with the revision practice of Capital and Small letters. Capital and Small cursive is introduced to the child at this stage. It is important to note that we use cursive style while writing and thus this portion of English must be practiced thoroughly for a better handwriting.

Many parents would like to teach their children English at home, but don't know how to start. It doesn't matter if your own English is not perfect. The most important thing is that you are enthusiastic and that you give your children lots of encouragement and praise. Your child will pick up on your enthusiasm for the language. Don't worry if your child doesn't start speaking English immediately. They will need a certain amount of time to absorb the language. Be patient, and they will begin to speak English in their own time.

The objectives of each topic are given in detail. Teacher / Parent must emphasize on the key concepts to be learnt by the child. Generally the foundation year of a child focuses more on construction of small words along with basic grammatical sense.

Grammar plays an important role in learning English Language. It helps in constructing sentences along with expression of thought in the right perspective. Teacher / Parent must give stress on the usage of the right parts of speech and tense by making the child understand the concept. Never try to emphasize on memorizing as this will weaken their basic concepts. Try to use sentences and communicate using more of the content relevant to the child and associated with the learning given in topics.

There are suggested activities and instructions for every topic. The emphasis is on developing basic concepts in an experiential manner. The learning of the child depends upon the ability of the Teacher / Parent to follow instructions & demonstrate.

Remember daily practice and regular engagement will definitely accelerate the learning. Small and regular use of English will develop acceptance and understanding of this language. Give the child an environment so that she / he can practice. Teacher / Parent should also develop reading habits in kids. Motivate them to spend time with books of their relevance. Never get worried or angry on mistakes done by the kids, rather motivate and correct them.

Happy learning
