

Drawing Art & Craft Workbook

2

Five cartoon children are holding a large white sign. The sign has three lines for text: 'Name : _____', 'Class : _____', and 'School : _____'. The children are smiling and looking towards the viewer.

Name : _____

Class : _____

School : _____

Foreword

Dear Parent / Teacher

This is the first stage of your child's formal learning. In the early stage it is important to focus on the physical development of the child along with the mental development.

The book contains sets of worksheets aimed at imparting knowledge to the child related to language, art and mathematics.

The worksheets are designed using the concept of collaborative learning so that the child can develop a holistic learning pattern in the foundation years of her/his education.

The focus of Parents / Teachers at this stage must be on developing conceptual learning and memorising. Involve the child in activities which generate curiosity. Play games which require recalling, remembering and logically reaching solutions.

We have designed more effective and comprehensive curriculum and evaluative instruments for children at various levels of cognitive growth.

There are Parent / Teacher guiding notes before each set of worksheets pertaining to a subject. Parents / Teachers must read the guiding notes and instructions carefully to understand and implement them.

The worksheets are perforated. The child should be given one worksheet at a time and once completed you may keep them in separate folder.

Happy teaching and learning...

Guiding notes for Parent / Teacher
(Level - 2, Drawing)

Dear Parent/ Teacher

This section of the worksheets deals with colours and creativity. The objective of teaching Drawing to the child at this stage is to develop understanding and recognition of colours.

Preschool is a time for young children to learn and develop artistic fundamentals. Art activities are engaging for preschoolers because they are opportunity for hands-on creation, which is how children retain information most effectively and efficiently at this age. Motor skills and eye-hand coordination skills are also developed through preschool art activities.

Many art projects can help students increase dexterity when working with their hands. Safely working with sculpting clay, coloring with crayons and drawing with markers develops fine motor skills.

Teach the child right method of holding crayons. The ability to hold and move hand or fingers will develop writing skills in the child. The child can be taught drawing some basic shapes with pencil and then choose the colours as per her / his choice. Remember you must motivate the child and appreciate the efforts irrespective of the output.

Parents / Teachers must focus on the following learning outcomes:

- Recognition of colours
- Reciting names of the colours
- How to hold crayons?
- Right movement of hand or fingers while scribbling

Engage the child in activities that use play to introduce colours. Ask and talk about colours in the environment around the child. For e.g. what is the colour of your dress?

Below are some suggested methods to enhance learning:

- Help your children learn colours of items or objects around them
- Make your own Flash Cards which allow children to explore the colours by playing games. (www.playwayshop.com offers similar products)
- Associate colours with objects and images available around the child
- Playing games with different coloured balls, using different coloured sheets to make paper toys etc.

Remember that every child has different learning abilities so don't push them hard rather make it fun for them to learn.

Happy learning
