Foreword

Dear Parent / Teacher

This is the first stage of your child's formal learning. In the early stage it is important to focus on the physical development of the child along with the mental development.

The book contains sets of worksheets aimed at imparting knowledge to the child related to language, art and mathematics.

The worksheets are designed using the concept of collaborative learning so that the child can develop a holistic learning pattern in the foundation years of her/his education.

The focus of Parents / Teachers at this stage must be on developing conceptual learning and memorising. Involve the child in activities which generate curiosity. Play games which require recalling, remembering and logically reaching solutions.

We have designed more effective and comprehensive curriculum and evaluative instruments for children at various levels of cognitive growth.

There are Parent / Teacher guiding notes before each set of worksheets pertaining to a subject. Parents / Teachers must read the guiding notes and instructions carefully to understand and implement them.

The worksheets are perforated. The child should be given one worksheet at a time and once completed you may keep them in separate folder.

Happy teaching and learning...

Guiding notes for Parent / Teacher
(Level - 2, Hindi)

Dear Parent/Teacher

Hindi is the second most popular language in India. As other languages, speaking Hindi is not a tough task but for many of us writing this language is a major problem. The first understanding to be developed amongst the learners is to differentiate between various sounds of pronunciation. In comparison to English, Hindi has extra symbols used to put stress for pronunciation and sound aka "Swar". The foundation of understanding the language and developing a liking towards this language begins from Kindergarten.

Parents / Teachers are advised to ensure that the child starts correctly pronouncing "Swar" and "Vyanjan". The key to understanding the usage of "Swar" as "Matrayein" lies in the pronunciation. The worksheets followed are designed keeping in mind that there are minute details to be focussed upon while teaching the child.

- 
- 
- 
- Give stress on the pronunciation of words so that the child can understand the implications of "Matra" while reading or writing
 - Make the child understand the basic grammar
 - Gender in Hindi language for Non-Living things is a critical area to deal with. Make sure that you correct the child whenever she / he commits a mistake
 - Never try to compare between languages. Some Parents / Teacher might deal Hindi as a second language and the orientation of the child also changes according to this, which results into disliking of Hindi as a subject
 - Formation of words and correct usage of "Matrayein" is the key to good writing ability
 - Pronunciation and vocabulary helps in construction of sentences to communicate

Parents / Teachers can play games or engage in different activities in routine life so as to enhance learning of Hindi language. One of the most effective ways to develop interest in the Child is to read stories to them with expressions. During a story session the Parents/ Teachers can relate it to experiential learning by constant quizzing and relating it to the real world external environment around the child.

Remember that speaking or understanding Hindi as a language is very easy for some but not for everyone so give equal importance to it.

There are certain "Swar" and "Vyanjans" which can be written in more than one way. We have tried putting the most common and ideal pattern of writing them. You are advised to follow the pattern acceptable in your academic surroundings.

Happy learning
